

War of the Survivors: Rule Book

Game Overview:

War of the Survivors is a collaborative and competitive trivia game where players rely on their teammates and opponents to answer questions correctly. Each question answered incorrectly leads to the elimination of one survivor, adding a strategic layer to the gameplay. The objective is to navigate through challenges, accumulate rewards, and be the last team standing.

- 1 Game Board (featuring a quest path with checkpoints)
- 200 Trivia Question Cards (divided into categories)
- Survivor Tokens (one for each player)
 - Reward Tokens
- Elimination Markers
 - Timer (optional)
 - Dice (1 six-sided)

Setup

- 1.Teams:** Players divide into two teams, each with an equal number of players. If there's an odd number, one team can have an extra member.
- 2.Game Board:** Place the game board in the center. Each team selects a starting point on the board.
- 3.Survivor Tokens:** Each player receives a Survivor Token, which represents their character in the game.
- 4.Question Cards:** Shuffle the trivia cards and place them face down in a designated area.
- 5.Reward Tokens:** Place reward tokens nearby for easy access.

Gameplay

Turns:

- 1.Question Selection:** The opposing team selects a trivia category and reads a question to the active team.
- 2.Answering:** The active team discusses the answer. They can choose to:
 1. Answer collectively
 2. Call on a specific player to answer
- 3.Time Limit:** If using a timer, the team has 1 minute to answer.

Correct Answers- (Answers can be found in right- bottom corner of cards)

- If the active team answers correctly, they advance one space on the board and receive a Reward Token.
- They can use Reward Tokens to:
 - Revive an eliminated survivor
 - Skip a future question
 - Move extra spaces

Incorrect Answers

- If the active team answers incorrectly, they must eliminate one of their Survivor Tokens. This player is "dead" for the remainder of the game and must place their token in the eliminated pile.
- The opposing team gains a Reward Token for the incorrect answer.

Checkpoints

- Certain spaces on the board are marked as checkpoints. Reaching these spaces grants additional rewards or special abilities, such as:
 - Reviving a previously eliminated survivor
 - Taking an extra turn
 - Changing the order of play

Winning the Game

- The game continues until one team has no survivors left or one team reaches the final quest checkpoint first.
- The surviving team with the most Reward Tokens is declared the winner.

Strategies

- Collaborate and communicate with teammates for the best chance of answering questions correctly.
- Keep track of which categories your opponents struggle with, and exploit those weaknesses.
- Decide strategically when to use Reward Tokens for maximum advantage.

Additional Rules

- Team Communication:** Players must work together but cannot share answers with the opposing team during their turn.
- Elimination:** If a team has no Survivor Tokens left, they are out of the game, and the opposing team wins.
- Question Categories:** Ensure a balance of categories to keep gameplay interesting and inclusive for different knowledge bases.

Conclusion

War of the Survivors combines trivia knowledge with teamwork and strategy, creating an engaging experience. Good luck, and may your team survive the challenges ahead!
