

3 Project Ideas!

9/9/26

Presented by

Carson Bauer

Class of 27

Turner's Man

Honda Spree Marlboro “Turners” Custom Build: Basically the Marlboro livery but for Turner’s. Instead of red it would be orange, any accent colors would be brown and white.

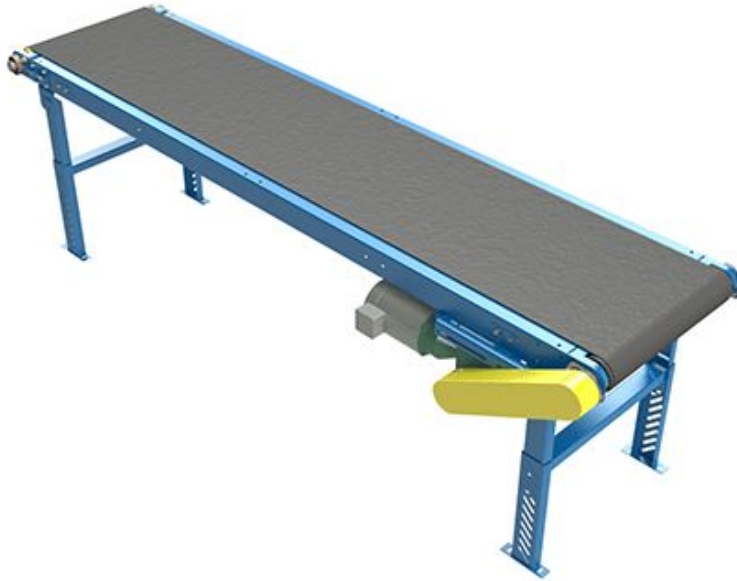

Turner’s Man: A persona of a man who rides around campus on his custom scooter, handing out free tea to all students. His costume would consist of a Turner’s sweater, brown cargo pants, boots, and a custom orange and white helmet with the logo on it. The image below was generated by AI, but gives a general idea.

Round Holder Hat!

3 Round shotgun holder for hats! They already make them that go on the side of your g*n, but not hats. 90% of hunters wear hats while hunting, so it's a no brainer.

Car Wash Conveyor

After working at a car wash all summer (shout out modwash), I realized how bad their chain systems are. Instead of using a chain that pulls your car and makes you put in neutral, why not a big ol' conveyor belt! Some stores are starting to experiment with this idea already, but with no success. In theory, it makes way more sense to have a large conveyor belt that allows you to put your car in park and it drags you along the wash.
